PERSONAL PROJECTS

"Images Search App"

- Technology used: Visual Studio, JavaScript, APIs.
- The goal of the project is to create a web application where users can search for images based on keywords.
- The app will fetch images from an external API (Unsplash) based on user input and display them in a visually appealing manner.
- Building an image search app involves integrating frontend and backend technologies to create a seamless user experience.
- GitHub Link: <https://prasanna-raikar.github.io/Images-Search-App/>

"Portfolio Website"

- Technology used: Visual Studio, JavaScript, Git.
- Built using JavaScript for a dynamic and interactive experience.
- Adjusts seamlessly to all screen sizes and devices.
- Accessible contact information, form and social media links.
- GitHub Link: <https://prasanna-raikar.github.io/Portfolio/>
